### Restriction Requirement

#### Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- a. Group I, claims 1-16, drawn to prognosis protocol methods, classified in class 435, subclass 7.4.
- b. Group II, claim 17, drawn to methods for determining human responsiveness to cholinomimetics, classified in class 435, subclass 4.
- c. Group III, claims 18-20, drawn to kits for performing pharmacogenetic analyses, classified in class 422, subclass 61.

2. The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together, or they have different modes of operation, or they have different functions, or they have different effects (refer to M.P.E.P. ¶s 806.04 and 808.01). In the instant case, each of the identified groups is directed toward a different scientific objective (e.g., determining prognosis protocols or responsiveness to cholinomimetics) that employs different scientific reagents and methodologies. Therefore, each invention is clearly drawn toward a different inventive entity.

4. Inventions I/II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together, or they have different modes of operation, or they have different functions, or they have different effects (refer to M.P.E.P. ¶s 806.04 and 808.01). In the instant case, none of the methodologies of Groups I or II require the kit of Group III, and

the kit of Group III does not require any of the methodologies set forth in Groups I and II. Therefore, each invention is clearly drawn toward a different inventive concept.

5 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, requirement for independent searches, and recognized divergent subject matter, restriction for examination purposes as indicated is proper. Applicants are  
10 required under 35 U.S.C. § 121 to elect a single group for prosecution on the merits. Applicants are also reminded that the claims should be amended, if necessary, to reflect the election.

#### ***Claim Cancellation***

15 6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must  
20 be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
